Jun 2024 - Oct 2024

Assisted with maintenance and upkeep of front end applications

Created a pixel-perfect replica of the Cozastore website from ThemeWagon to sharpen my front-end development skills. This project involved accurately recreating the layout, design elements, and interactions, allowing me to deepen my understanding of HTML, CSS, and JavaScript. This exercise showcases my attention to detail and ability to replicate complex design structures, all for educational and practice purposes.

Mentored junior front-end developers, helping them grow their skills and knowledge within team.
